Foreword	xvi
Preface to the Sixth Edition	xviii
About the Author	xx
<b>1 What Is High-End Audio?</b>	<b>1</b>
<b>2 Choosing a High-End Audio System</b>	<b>7</b>
Introduction	7
Choosing the System Best Suited to Your Needs	9
Setting Your Budget	10
The Complete vs. the Incremental Purchase	11
Value vs. Luxury Components	12
Allocating Your Budget to Specific Components	13
Upgrading a Single Component	16
How to Read Magazine Reviews	17
System Matching	20
Do's and Don'ts of Selecting Components	21
Your Relationship with the Retailer	22
Used Equipment	24
Product Upgrades	25
Component Selection Summary	25
<b>3 Becoming a Better Listener</b>	<b>27</b>
Audiophile Values	29
Pitfalls of Becoming a Critical Listener	32
Sonic Descriptions and their Meanings	32
Tonal Balance	35
Perspective	36
The Treble	36
The Midrange	38
The Bass	40
Soundstaging	42
Dynamics	45
Detail	46
Pace, Rhythm, and Timing	47
Coherence	48
Musicality	48
Notes on Learning Descriptive Terms	51
Critical-Listening Setup Procedures	51
Single-Presentation Listening—What It's All About	54

	Critical Listening Summary	55
	Addendum: Level Matching	55
<b>4</b>	<b>Preamplifiers and Phono Stages</b>	<b>57</b>
	Introduction	57
	How to Choose a Preamplifier	61
	Balanced and Unbalanced Connections	63
	What to Listen For	63
	Tubes vs. Transistors	66
	Tube Life and Replacement Options	67
	The Line-Stage Preamplifier	68
	The Phono-Stage Preamplifier	69
	RIAA Equalization	69
	Phono-Stage Gain	71
	Cartridge Loading	73
	Balanced Phono Inputs	74
	The Transimpedance Phono Stage	74
	Non-Standard Phono Stages	74
	The Digital Preamplifier	75
	Audio/Video Controllers and Multichannel Preamplifiers	75
	How a Preamplifier Works	76
	Balanced and Unbalanced Preamplifiers	78
<b>5</b>	<b>Power and Integrated Amplifiers</b>	<b>81</b>
	Introduction	81
	How to Choose a Power Amplifier	83
	Integrated Amplifiers	83
	How Much Power Do You Need?	85
	The dBW Power Rating	86
	Why Amplifier Output Current Matters	88
	What to Look For when Comparing Power Ratings	89
	Why Amplifier Power Isn't Everything	90
	Other Power-Amplifier Considerations	92
	Tubes vs. Transistors	92
	Balanced Inputs	93
	Bridging	94
	Bi-Amping	94
	What to Listen For	96
	A Survey of Amplifier Types	98
	Single-Ended-Triode Amplifiers	98
	Single-Ended Solid-State Amplifiers	100
	Class D (Switching) Power Amplifiers	101
	Digital Amplifiers	102
	A Unique Amplifier	104
	Output-Stage Topology and Class of Operation	105
	How a Power Amplifier Works	108
	The Power Supply	109
	Input and Driver Stages	110
	Output Stage	111
	How a Tubed Power Amplifier Works	112

- 
- 6 Loudspeakers 117**  
Introduction 117  
How to Choose a Loudspeaker 118  
    Other Guidelines in Choosing Loudspeakers 120  
    Finding the Right Loudspeaker—Before You Buy 121  
What to Listen For 121  
Loudspeaker Types and How They Work 124  
    The Dynamic Driver 124  
    The Coaxial (Concentric) Driver 126  
    Dynamic Compression 127  
    Problems with Dynamic Drivers 128  
    The Electromagnetic Dynamic Driver 128  
    The Planar-Magnetic Transducer 129  
    The Heil Air-Motion Transformer 133  
    The Electrostatic Driver 134  
The Dipolar Radiation Patterns of Ribbons and Electrostatics 137  
    Bipolar and Omnidirectional Loudspeakers 137  
The Horn Driver 139  
    Waveguides 141  
The Plasma Driver 142  
The Bending-Wave Driver 142  
The Full-Range Driver 144  
Loudspeaker Enclosures 144  
    Infinite-Baffle Loading 145  
    Reflex Loading 145  
    Passive Radiators 147  
    Transmission-Line Loading 147  
    Isobaric Loading 148  
    The Finite Baffle 148  
    System Q 149  
Powered and Servo-Driven Woofers 150  
Enclosure Resonances 152  
    Enclosure Shapes 155  
    Loudspeaker Footers 156  
Crossovers 157  
Powered and Active Loudspeakers 160  
Digital Loudspeakers 161  
DSP Loudspeakers 163  
Wireless Loudspeakers and Integrated Systems 164  
Subwoofers 166  
    Subwoofer Technical Overview 170  
Loudspeaker Stands 172
- 7 Digital Source Components: DACs, Music Servers, Streaming, Disc Players, Interfaces 173**  
Introduction 173  
How to Choose a Digital Source—Overview 174  
What to Listen For 175
- 
-

DAC Features and Specifications	178
Number and Type of Inputs	183
Wireless Connection: Bluetooth, AirPlay2, and Chromecast	184
Master Quality Authenticated (MQA)	186
Streaming	186
Choosing a Streaming Service	186
Networking Capability	188
DSD Decoding	188
DSD over PCM (DoP)	189
Volume Control and Source Switching	190
Selectable Digital Filters	191
Balanced Outputs	191
Upsampling	192
Internet Radio	192
Hardware or Software Updatable DACs	192
Music Servers	193
Music Server Sound Quality: Better than Disc	194
Music Server Features	195
Music-Management App	196
Integral DAC	196
Room	196
Integral Storage	199
External Storage and Backup: USB and NAS Drives	199
Digital Outputs	200
DSD Support	201
Music Server Accessories	201
USB Reclockers	201
Ethernet Isolators and Switches	202
A Music-Server Alternative: The Network Bridge	202
Downloading Music	204
File Formats	204
Download Caveats	206
Transferring an LP Collection to a Server	207
Disc Players	209
Super Audio Compact Disc (SACD)	210
Universal Disc Players	211
Blu-ray Disc	212
Bass Management in SACD and Universal Players	212
Extracting High-Resolution Data Streams from Disc Players	213
Digital Interfaces	214
S/PDIF	214
USB	216
Ethernet	217
I <sup>2</sup> S	217
Proprietary Digital Interfaces	218
Jitter in the Digital Interface	218
Outboard Clocks	219

---

---

---

Computer-Based Music Servers	221
The Do-It-Yourself, PC-Based Music Server	221
The Importance of Bit Transparency	221
Computer Requirements	222
Operating System and Playback Software	223
Metadata	223
Hard-Disk and Solid-State Storage	224
Loading Your Server with Music	225
Getting Music from the Server to Your Playback System	227
Networking	228
Technical Addenda	229
High-Resolution Digital Audio: Why 44.1kHz Sampling and 16-bit Quantization Aren't Enough	229
16 Bits, 20 Bits, 24 Bits	231
A Caveat About High-Resolution Digital Audio	233
Direct Stream Digital	234
How a DAC Works	236
Custom Digital Filters	238
Digital-to-Analog Conversion	238
Delta-Sigma DACs	239
Analog Stages	241
Balanced Outputs	241
MQA Explained	243
Background: An End-to-End System	244
MQA in Practice	245
MQA Sound Quality	247
MQA Technology	247
Temporal Blur	248
Rethinking the Container	250
Encapsulation and Music Origami	252
<b>8 Turntables, Tonearms, and Cartridges: The LP Playback System</b>	<b>255</b>
Introduction	255
LP Playback Hardware Overview	257
System Hierarchy: Why the LP Front End Is So Important	257
How to Choose an LP Playback System	257
What to Listen For	260
Technical Aspects of Choosing an LP Front End	263
The Turntable	265
The Base and Plinth	266
Sprung and Unsprung Turntables	267
The Platter and Bearing Assembly	269
Platter Mats, Record Clams, and Vacuum Hold-Down Systems	270
The Drive System	271
The Tonearm	272
The Phono Cartridge	272
Moving-Magnet and Moving-Coil Cartridges	277
The Moving-Iron Cartridge	280
The Strain-Gauge Cartridge	280

---

---

- The Optical Cartridge 280
  - Phono Cartridges and Balanced Operation 281
  - Stylus Shapes and Cantilever Materials 282
  - LP Playback System Setup 284
  - Record Care and Cleaning 288
  - Vinyl as Art: Half-Speed Mastering, 45rpm Pressings, 180-Gram Vinyl, Mobile Fidelity's One-Step Process, and Direct-to-Disc LPs 291
  - 9 Cables and Interconnects 297**
    - Introduction 297
    - How to Choose Cables and Interconnects 299
    - How Much Should You Spend on Cables and Interconnects? 301
    - What to Listen For 302
    - Binding Posts and Cable Terminations 303
    - Bi-Wired Loudspeaker Cables 304
    - Balanced and Unbalanced Lines 306
    - Cable and Interconnect Construction 309
      - Conductors 309
      - The Dielectric 310
      - Terminations 311
      - Geometry 311
    - Terminated Cables and Interconnects 312
    - Battery Bias in Cables and Interconnects 313
    - Cable and Interconnect Specifications 316
    - Cables in the Power-Amplifier/Loudspeaker Interface 315
  - 10 Audio for Home Theater 317**
    - Introduction 317
    - Overview of Home-Theater Systems 318
    - Dolby Atmos and DTS:X 320
    - Should You Choose a 5.1-, 7.1-, or 9.1-Channel System? 321
    - Home-Theater Controllers 322
    - How to Choose a Controller 323
      - Inputs, Outputs, and Source Switching 323
      - Automatic Calibration 324
      - DSP Speaker and Room Correction 325
      - Analog Bypass Modes 325
      - Bass-Management Flexibility 326
      - 8-Channel Analog Input 326
      - Digital-to-Analog Conversion 327
      - 7.1-Channel and 9.1-Channel Playback from 5.1-Channel Sources 327
      - THX Certification 327
      - Audio Return Channel, Network Connection, Wireless Streaming, and Multi-Zone 328
    - Multichannel Power Amplifiers 328
      - How to Choose a Home-Theater Power Amplifier 329
    - Loudspeakers for Home Theater 330
      - The Center-Channel Speaker 330
      - Adding a Center Speaker to Your System 331
- 
-

---

Left and Right Speakers	331
Surround Speakers	332
Dipolar and Bipolar Surround Speakers	332
Surround-Back Speakers	332
Height Speakers	334
Subwoofers	334
Setting Up a Home Theater	334
Basic Setup	334
Acoustical Treatment	335
Speaker Placement	335
Surround Speaker Placement	335
Center Speaker Placement	336
Left and Right Speaker Placement	336
Calibrating a Home Theater	337
Bass Management	338
Setting Individual Channel Levels	338
Adding Home Theater without Compromising Music Performance	339
Addendum: Surround-Sound Formats Explained	341
<b>11 Multichannel Audio</b>	<b>345</b>
Introduction	345
A Short History of Multichannel Audio	346
Do We Want Multichannel Music Playback?	348
How to Get Multichannel Audio in Your Home	352
Loudspeaker Types and Placement	354
Bass Management	354
Calibration	355
Multichannel Playback from 2-Channel Sources	356
Ambisonics	358
<b>12 Personal Audio: Headphones, Desktop, and Mobile Audio</b>	<b>361</b>
Introduction	361
Headphones	362
Earbuds, Earphones, and In-Ear Monitors	362
Headphones	364
Dynamic, Electrostatic, and Planar-Magnetic Headphones	367
Headphone Enhancement Technologies	369
Crossfeed Circuits	369
Smyth Virtual Surround (SVS)	369
Binaural Listening	371
Multichannel Headphones	372
Headphone Specifications	373
Headphone Amplifiers	374
Balanced and Unbalanced Drive	375
Portable Audio	376
Desktop Audio	379
<b>13 System Setup Secrets, Part One: Loudspeaker Placement and Room Acoustics</b>	<b>381</b>
Introduction	381

---

---

Loudspeaker Placement	382
Loudspeaker Placement in Asymmetrical Rooms	389
Short-Wall vs. Long-Wall Placement	391
Dipolar and Bipolar Loudspeaker Placement	392
Subwoofer Setup and Placement	393
Loudspeaker Placement Summary	395
Common Room Problems and How to Treat Them	396
Acoustical Dos and Don'ts	404
A Short Course in Acoustical Theory	406
Listening-Room Resonance Modes	406
Optimizing Dimensional Ratios	408
Standing Waves	412
Reverberation	413
Building a Listening Room from Scratch	417
Isolating the Listening Room	417
The IsoWall Technique	418
DSP Room Correction	421
<b>14 System Setup Secrets, Part Two: Expert Tuning Techniques,     Accessories, Equipment Racks, and AC Power Conditioners</b>	<b>425</b>
Introduction	425
Accessories	426
How to Choose Accessories	427
Analog Accessories	432
System Setup Techniques	435
Equipment Placement	435
Cables and Interconnects	436
Tubed Equipment	437
LP Playback	438
Digital Playback	439
Loudspeakers	439
AC Power	440
General	440
Equipment Racks and Isolation Devices	441
Equipment Racks	441
Vibration-Control Accessories: Spikes, Feet, and Cones	443
AC Power Conditioners and AC Cords	444
AC Power Cords	447
Dedicated AC Lines	447
A Final Note	450
<b>15 Specifications and Measurements</b>	<b>451</b>
Preamplifiers	451
Power Amplifiers	454
Loudspeakers	456
Digital Components	461
<b>Appendix A: Sound and Hearing</b>	<b>463</b>
Introduction: What is Sound?	463
Period and Frequency	464

---

---

---

Wavelength	465
Phase	465
Absolute Polarity	466
Complex Waves	467
Comb Filtering	469
Absorption, Reflection, and Diffusion	469
Diffraction	470
The Decibel (dB)	471
Frequency, Loudness, and Equal Loudness Contours	474
Weighting Filters	475
The Dynamic Nature of Music	476
Localization	477
Other Psychoacoustic Phenomena	478
<b>Appendix B: Audio and Electronics Basics</b>	<b>479</b>
Introduction	479
Voltage, Current, Resistance, and Power	479
Ohm's Law	480
Series and Parallel Circuits	482
Alternating Current (AC)	483
Electromagnetic Induction, Inductance, and Capacitance	484
Filters	486
Impedance	488
Loudspeaker Phase Angle	489
Capacitor Types	490
Anatomy of an Audio Product	491
The Power Supply	491
Amplifier Circuits	494
Amplifier Distortion	498
Vacuum Tube Amplifiers	499
Operational Amplifiers	500
Digital Electronics	501
<b>Appendix C: Digital Audio Basics</b>	<b>503</b>
Introduction	503
Binary Number System	504
Sampling and Quantization	506
Sampling Rate, Nyquist Theorem, and Aliasing	506
Quantization	509
Dither	511
Digital Audio Storage	513
Error Correction	513
Digital-to-Analog Conversion	514
Jitter Explained	514
Digital Signal Processing (DSP)	516
Perceptual Coding	517
<b>Glossary</b>	<b>519</b>
<b>Index</b>	<b>559</b>
